THE HOME OF

ARCHIAS' SURE SEEDS

FOUNDED 1884

INCORPORATED 1905

Sedalia, Mo., January 1, 1910.

Our Prediction.

"If a man preach a better sermon, write a better book, or make a better mousetrap than his neighbor, though he build his home in the woods, the world will make a beaten path to his door."

This is equally true of the seed industry. When we began business over a quarter century ago we were under the impression that there would always be a demand for the BEST. Our prophecy was the correct one.

The demand for "Archias' Sure Seeds" has steadily increased all these years until now our plant is one of the largest in the country and will have to be expanded still farther to take care of our increasing trade.

Why this enormous business? There are three reasons, i. e.: superior goods, full weight and square dealing. Why waste your money with inferior seeds of unknown quality and work overtime trying to perfect them? Buy Archias' "Sure" Seeds and Supplies that the trade mark is a household word, and let the other fellow worry.

Give the prices in this catalogue a chance to testify that we do share with our customers the benefits of experience, quality and low cost. Kindly look our catalogue over carefully for what you are in need of and send us your orders. If our prices are not right, or if there is anything not satisfactory, write us, be friendly, and we will do our utmost to please you.

Every order, no matter how small, is given our personal attention.

Our catalogues are free. Tell your neighbors about the Archias' Plan, and have them send for our catalogue; thus you do a two-fold favor, which we assure you is appreciated, as many hundreds of new customers are added each year by the recommendations of our old friends

Heartily wishing one and all a Happy and Prosperous New Year, we remain,

Most sincerely yours,

L. H. ARCHIAS, President.

L. A. KIPPING, Vice President.

L. ARCHIAS, Secretary.

VIEWS FROM OUR ESTABLISHMENT

The largest and oldest Seed and Supply House in Missouri. Many thousand copies of this catalogue will be mailed to customers who have never seen our establishment, and for their benefit we show a few small views, as we have not room for larger ones. We extend all a cordial invitation to visit our Seed establishment and trial grounds where you will always be welcome. We will take pleasure in explaining our method of handling your orders.

SECTION OF ONE OF OUR SEED WAREHOUSES.

We own all the buildings used for our great Seed and supply business, and have same fitted with modern machinery. Our facilities are unsurpassed for accuracy in filling orders and promptness in shipping, thus assuring satisfaction to our customers.

PART OF OUR MILL ROOM.

Here is where the seed is carefully re-cleaned and graded. All the light and inferior seeds and foreign matter is taken out before being sacked. This is one of the most important departments of our establishment, as too much care cannot be exercised.

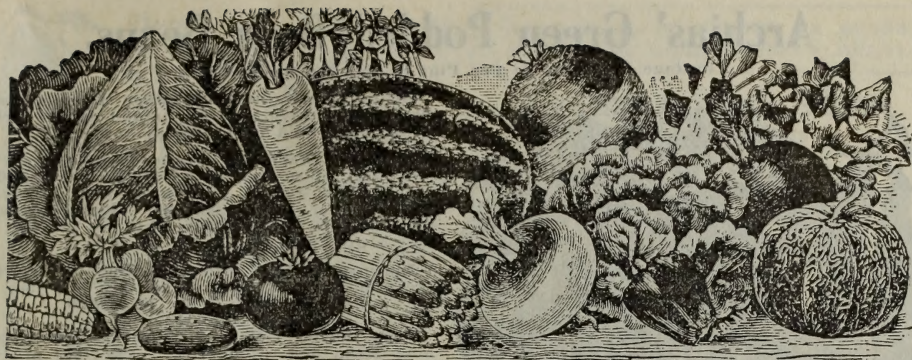

WEIGHING AND SACKING SEEDS.

All our machinery is run by electricity, insuring even blast, cheap and rapid service.

FILLING ORDERS FOR ARCHIAS' SURE SEEDS.

This last view shows part of our Small Seed Department where the greatest of care is exercised in packing and handling orders. Whether large or small, they receive the same prompt attention.

For later use the seed may be sown out of doors.

Archias' Mammoth Tree Tomato.

GREATEST WONDER OF THE AGE.

Thousands of our friends have planted Archias' Mammoth Tree Tomato for over fifteen years, and it is more popular today than any other variety, especially to the family gardener.

Fruit is of mammoth size, flesh very thick, excellent flavor, ripens well up to the stem; color dark red, tough skin. Bears well throughout entire summer, holding its large size during severe drouth, while other varieties are dried up. It continues to bear its fruit with the greatest vigor until killed by the frost. Shape round and smooth. The yield of this Tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of 10 feet, and 9 feet across. This should not be classed with other so-called tree tomatoes of some houses, as it is the only genuine Tomato of the kind now in existence. Price: 10c per pkt.; 3 pkts. 25c; oz., 40c; ¼ lb., \$1.25; 1 lb., \$4.50, by mail, postpaid.

Tree and Hedge Seeds.

It is said that in twenty-five years our forests will be virtually, if not fully, exterminated for commercial uses. America is on the eve of a forest famine. This is inevitable. Hence forestry or tree growing for profit must and will become an industry in this country, the same as wheat and alfalfa. The end is near, and soon 100,000,000 people in a timberless land will be appealing to 40,000 empty, idle mills for 50,000,000,000 feet of lumber annually.

General Rule—Plant tree seeds in early spring in drills about two feet apart; cover $\frac{1}{4}$ inch or more in depth, according to size of seed; keep them from drying out.

One pound lots and less include postage. Larger lots at buyer's expense.

Prices subject to change.

Osage Orange—A native from Texas, but has been generally introduced over the country from its extensive employment as a hedge plant. The best way to prepare the seed for planting is to soak in a running creek until it commences sprouting, then plant like any other seed. Another way to sprout it is by putting it in a vessel and covering it daily with warm water, until the sprouts come up. We prefer the first mentioned. Proper time to sow is in April or May.

How to Make a Hot Bed.

Select a well-drained spot, and make the pile of manure 15 to 18 inches deep; or a foot of soil may be dug out and filled in with manure, well tramped down. Place the frame on it. Then put four inches of good soil over the surface. Throw some manure or soil up against the outer boards, to hold the heat. Put on the sash and keep tight for three or four days. Keep a thermometer in the bed, and when the temperature falls to 75 degrees, seed may be sown with safety. The temperature in a hot bed should not be allowed to go above 70 degrees in the day, nor below 50 at night. With a hot bed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as Egg Plant, Pepper, Tomatoes, etc., and such flower seeds as Heliotrope, Scarlet Sage, Vinca, Verbena, etc., along in March, it is possible to have nice stocky plants ready to set out as soon as the weather conditions are favorable, insuring early returns from the vegetables and a long season from the flowers.

Write for circulars and prices on Hot Bed Sash. We are agents for the celebrated "Sunlight" Double Glass Sash for Hot Beds and Cold Frames.

Bromus Inermis.

Bromus Inermis—Introduced from Hungary, Europe, by the U. S. Dept., of Agriculture. Particularly adapted to rather poor, dry soils which are not suitable to other grasses, and is useful for both grazing and hay, especially in mixture with other grasses. We do not consider it as valuable as it has generally been recommended, but for lands which will not grow better grasses, would recommend it. Sow from two to three bushels to the acre either in spring or fall. Per lb., 20c; bu., (14 lbs.) \$1.75.

The Amount of Seed

necessary to sow an acre largely depends on the quality of land; the poorer the soil the larger the quantity required. A fair average is from 35 to 40 pounds to the acre. The thicker seeds are sown, the sooner will a fine close turf be obtained.

Broadcast Seeders.

The Improved Cyclone Seeder has stood every test of more than forty years exacting service. It will sow all varieties of Farm Seed that can be sown broadcast and with ease to the operator; 5 acres per hour is a fair average for the Cyclone. The seed is distributed evenly and with great saving of time which makes this a very practical machine on any size farm. It increases profits both ways—in better crops and in time and seed saved. It will pay for itself in sowing one bushel of clover seed. It is a convenient, practical and durable machine. Sent anywhere on trial. Price, each, \$1.50.

Chicago Seeder, is like the Cyclone only that it operates with a bow instead of a crank. Price, each, \$1.25.

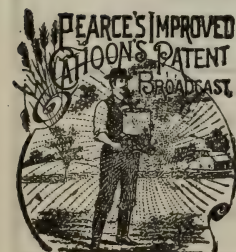

Little Wonder Seeder, smaller than the Cyclone, operates with a crank. Price, each, \$1.00.

Cahoon Seeder, well known will do good work like the Cyclone. Price, each, \$2.95.

Every sower fully guaranteed by the manufacturers.

Armour's Animal Fertilizers.

Commercial fertilizer is a guarantee of a profitable crop if properly sown on properly tilled and properly drained land. Proper selection of soils, proper rotation of crops, proper drainage and cultivation are the essential things—without which good results should not be expected.

With best of care soils "wear out." Every bushel of grain or vegetables, every animal that leaves the farm takes with it just so much of the fertility of the soil. The nitrogen can be restored from the air by proper rotation with cowpeas, clover or alfalfa—this should be done. But phosphoric acid and potash can only be restored practically by Commercial Fertilizers—and the Armour's Fertilizers have no equal.

Figure with us for oats, corn and grass in the spring, and for wheat in the fall.

I have used Armour's Ammoniated Dissolved Bone and Potash every year beginning 1901, and expect to use it this year. Am sure it pays well on wheat for it increases the yield, improves the berry and prevents rust. I am well pleased with the results.

HENRY VERKAMP.

Ritchey, Mo.

I used 1000 pounds of Armour's Ammoniated Dissolved Bone and Potash on part of my wheat and made twenty bushels to the acre. Other wheat without fertilizer made only eight bushels. The quality of the fertilized wheat was twice as good as the unfertilized.

RETURN THE ATTACHED.

25c--SEED DUE BILL--25c

Good for 25 Cents Worth of Seeds in Packets

We want everyone who secures this catalogue to send us at least a trial order. A large per cent of our customers remain with us from year to year, and by fair dealing we endeavor to make all our personal friends. Again last year through the good will of our friends, we increased our mailing list many thousands, and this year we hope to introduce ourselves, through the medium of our catalogue and by fair representations, to thousands of new people.

Any one receiving this insert, in one of our catalogues, can detach the "Due Bill" below, and by returning it to us, with his first order, select **25 cents worth of seeds, in packets, additional.** **See Due Bill**

We want your orders, and as a special inducement for you to give us a trial this year, we make the above offer. This is in addition to the discounts we allow on all packets and ounces.

A small order from you this spring will place your name and address on our books, and you will receive our catalogue at the first of next season.

Most sincerely yours,

ARCHIAS' SEED STORE CORPORATION,

Sedalia, Missouri

SEED DUE BILL

This Due Bill (see other side) is good for 25 cents worth of Vegetable or Flower Seeds in packets (not including collections), your own selection, when returned with any order amounting to \$1.00 or more.

If returned to us, this season, with any order, we will keep your name on our mailing list and send you our catalogue for another year without request.

EARLY ORDERS SOLICITED

Five Per Cent Cash Discount

On Orders Received Before March 1st.

March and April are our busy months, and we often find it necessary to work nights, in order to keep up with our orders. From one cause or another many of our customers delay sending in their orders until the last moment. To induce as many as can order earlier, we have decided to offer an extra discount—five per cent in cash—on everything quoted in our catalogue but not on special prices not quoted in catalogue, a few things like Clover Seed, where the prices are marked "Subject to change," provided the order reaches us on or before March 1st. In other words, if your order amounts to \$5.00, and you intend sending it to us in March or April, mail it so we will receive it by March 1st, and we will accept, from you, in full payment for the order \$4.75. Furthermore, we will allow you (**see other side**) 25 cents worth of seeds in packets extra, with your first order.

No matter how large, or how small your order, it will pay to send it in early—five per cent is a pretty liberal discount for so short a time. If, however, you should not order until the seeds are needed, we will give order our usual prompt attention.

ARCHIAS' SEED STORE CORPORATION,
Sedalia, Missouri.

DETACH HERE—SEE OTHER SIDE.

RETURN THIS SLIP. Good for 25 cents worth of Seeds when filled in with good names below and returned with your first order. (see other side) accompanied by an order of \$1.00 or over in cash.

Write below plainly, the **Names** and correct **Postoffice** addresses of a few of your friends and neighbors who buy seeds.

We'll Stand Part of the Cost

We should like to place a year's subscription to the GARDEN MAGAZINE in the hands of every one of our patrons, because it will help them to a wiser selection, better care, and richer enjoyment of the flowers they buy from us.

The publishers' price is \$1.50 a year, and it is well worth the money. But our price for reasons already stated (to any one who will order \$1.00's worth from our Catalog) is going to be *only \$1.00 a year, thus we save you 50c.*

Or if you prefer to pay to us the publishers' price of \$1.50 a year (and we repeat that the Magazine is well worth that cost) you may also have, *entirely free*, from us 50c. worth of anything else you choose to select from our Catalog.

This is our way to encourage you to take and read the Garden Magazine.
